

# 1830 Census for Effingham County, Georgia

---

**Note:** Where I have the information, I have posted possible marriages with the person in the census. If I have listed choices then I have no information as to which one, or if either one of them are the correct marriage for than individual, these are put there as a help for those of you researching in this area.

If you have information on these families, it would certainly be helpful to be able to match all of them to a family line. I will be happy to build a webpage to place your information on and link to it from the census, if you will email me and let me know that you have information to do this with.

--	--

END OF THIS TRANSCRIPTION

Please note that at this point I have put all the information into the document that I currently have transcribed, I will hopefully be able to add more to this as time permits, and hopefully some of the researchers will share with all of us so that we can fill in all of these people with "real charts" of descendants.

Good Luck in your research and happy hunting.
